

Microsoft Dynamics NAV 2009

Streamlining your business from beginning to end

Microsoft Dynamics NAV is Microsoft's leading mid-market business management solution. The latest version is a highly flexible product, which will quickly deliver measurable gains across your business.

Microsoft Dynamics NAV

Microsoft Dynamics NAV is a cost effective, robust and flexible mid-market business management solution. It's a fully integrated solution which will bring your whole organisation together as it fully integrates all departments of your business, including Manufacturing, Sales, Marketing and Human Resources to name a few. What's more, Microsoft Dynamics NAV has extensive business intelligence and reporting facilities which will help you uncover valuable nuggets of information and enable you to make more informed business decisions.

Business Wide Application

Microsoft Dynamics NAV will provide substantial gains to a business. Rather than having to run several unconnected pieces of software, Microsoft Dynamics NAV allows you to manage your whole business using one system. What's more, Microsoft Dynamics NAV has the same look and feel as other Microsoft products and this familiarity results in high user uptake.

An integrated and adaptable Business Management Solution

Microsoft Dynamics NAV can be adapted to the way your business works, it will integrate with existing systems and if the standard version doesn't match your requirements there are a variety of add-on applications available which extend the capabilities of the software to meet industry specific needs.

Microsoft Dynamics NAV is easy to use. The familiarity and functionality of the software helps employees work more productively, make more informed decisions and respond quickly to developments in the market. Microsoft has also invested heavily in making much of the functionality of Dynamics NAV role tailored - its design is based around people's roles and the tasks they perform.

Concentrix can deploy Microsoft Dynamics NAV quickly and with minimal disruption to your business. What's more, Concentrix will configure Microsoft Dynamics NAV to match the exact needs of your business and provide training and ongoing support once the system has been implemented.

Benefits of NAV

- » Enables you to make more confident decisions
- » Customise Microsoft Dynamics NAV to meet your specific business requirements
- » Integrate your key business processes
- » Easy to use
- » Improves efficiency, effectiveness and ultimately profitability
- » Higher user uptake due to the familiarity of the layout

Microsoft Dynamics NAV options

With Microsoft Dynamics NAV, there is a high degree of functionality which comes as standard. However, Concentrix can customise the solution so that it matches your exact requirements. There are Microsoft Dynamics NAV modules to cover every element of business. These include:

- » Microsoft Dynamics NAV for financials
- » Microsoft Dynamics NAV for Sales and Marketing
- » Microsoft Dynamics NAV for Jobs and Project Management
- » Microsoft Dynamics NAV for Service Management
- » Microsoft Dynamics NAV for HR Management
- » Microsoft Dynamics NAV for Supply Chain Management
- » Microsoft Dynamics NAV for Manufacturing
- » Microsoft Dynamics NAV for Business Intelligence

Plus there are literally hundreds of approved vertical specific add-on applications.

Connect the key functions of your business

Microsoft Dynamics NAV provides one centralised source of data which the whole business can work from. As a result there is less duplication of effort in terms of inputting information, there will also be greater efficiency and

effectiveness as there will no longer be departments which are working in isolation. Through implementing a fully integrated solution there will be a significant improvement in efficiency and effectiveness and therefore customer satisfaction, retention and ultimately profitability.
